OCGC Seminar
11:30am February 15th 2024
Room: **STEM 464**
Coffee will be available from 11:00

Dr. Michael Broadley, Woods Hole Oceanographic Institute (WHOI).

Zoom Meeting ID: 950 0224 3183;

Passcode: m5Lny1

<https://uottawa-ca.zoom.us/j/95002243183?pwd=QkVwU2NIQUxEZW5pOWowY0VaRmRVQT09>

Coupled noble gas isotope and nitrogen isotopologue analyses reveal extensive subsurface fractionation within hydrothermal system

Speaker Bio

Michael successfully completed a four-year undergraduate degree in 2011 at Glasgow University after which he was based in Manchester where he successfully defended his PhD in 2015. After a short stay at Oxford University as an Academic Visitor Michael was a University of Tokyo JSPS research fellow for a year, and then undertook a postdoctoral position in CRPG in Nancy, France. Michael currently is a WHOI research associate but will be moving to Manchester next month for a NERC fellowship.

For further information, and to arrange to meet the speaker, please contact Dr. Oliver Warr (owarr@uottawa.ca).
